

HUCKLEBERRY LINE SOLAR PROJECT

Be the Sunshine, Miami County!

Huckleberry Line Solar Project, LLC is proposing a 301.5 MW solar and 76.5 MW BESS facility Miami County, bringing many positive impacts to the local economy and community.

A solar project is an economic development opportunity for landowners and local tax jurisdictions to harvest new stable rent and property tax revenue from sunlight.

We are excited to be working in partnership with the Miami County community on an opportunity to host a clean, environmentally compatible, renewable energy generation facility.

HUCKLEBERRY LINE SOLAR PROJECT

The Benefits of Going Solar in Miami County:

- Project investment represents a significant increase to the local tax base and creates stable tax revenue for Perry, Richland and Union Townships, Miami County, and North Miami Community Schools
- Project tax revenues contribute to the county budget without burdening existing services or requiring any new County services, like utilities or road construction
- EDA Payments constitute new County revenue above its annual budget to foster economic development
- EDA Payments total \$17.1 million, including \$1.5 million paid prior to construction, with the balance paid over the first four years of operations
- Hundreds of new full-time jobs during the construction and an estimated 5-6 full-time operations jobs over the projected 35-year life of the project
- Direct positive economic impact through landowner payments and local wages
- Indirect positive economic impacts from spending on local goods and services during the construction phase and in support of operation
